FRIENDS'
ALMANAC

FOR THE YEAR

1871:

CONTAINING

An account of the times and places of holding the Meetings of Friends on the Continent of America.

Astronomical Calculations for the 40th degree of N. Latitude, and adapted to the Meridians of

New York, Philadelphia, Baltimore and Cincinnati.

TO BE CONTINUED ANNUALLY.

PHILADELPHIA:
FRIENDS' PUBLICATION ASSOCIATION.

SOLD BY

T. ELLWOOD CHAPMAN, No. 701 Arch Street, Philadelphia
ELI M. LAMB, Lombard Street, Baltimore, Maryland.
JOS. ARNOLD, Jr., 134 Sixth Avenue, New York.
JOHN J. CORNELL, Mendon, New York.
GEORGE O. FRITTS, Macedon, New York.
BENJAMIN STRATTAN, Richmond, Indiana.
ELI GARRETSON, Salem, Ohio.
REBECCA W. BANCROFT, 813 Market St, Wilmington, Del.
SARAH W. HAINES, West Chester, Pennsylvania.
JOS. FORMAN, Gwynedd, Pennsylvania.
LEVI K. BROWN, Goshen, Lancaster Co., Pennsylvania.
ROBERT HATTON, Selma, Clark Co., Ohio.

AND OTHER AGENTS.

This Almanac has been transferred by the former publisher, T. ELLWOOD CHAPMAN, to this Association. The calculations for the present year have been made by Dr. Jos. Foulke, Buckingham, Penna. It is desirable that a "*Friends'* Almanac" may continue to be published under the supervision of Friends, adapted to the wants of the Society.

It is hoped that its circulation will be increased, and thus the Association may be enabled to enlarge and improve it.

FRIENDS' BOOKS

FOR SALE AT

No. 701 Arch Street, Philadelphia.

Summary of Christian Doctrines of Friends,	15, 18 & 2
Divisions in Society of Friends, T. H. Speakman,	
Memoirs of John Roberts,	35 & 4
Vital Religion, per doz.	7

Essays on Practical Piety,	2
Thoughts for the Children,	2
Friends' Family Almanac,	1
Friends' Pocket Almanac,	

Marriage Certificates by Friends' Ceremony, also filled up in the neatest manner.

OTHER BOOKS FURNISHED TO ORDER.

NOTES TO THE READER.

I. The Astronomical calculations in this work are made to true clock time. The effects of Refraction, according to the latest improved Tables of Bessel, and the Equation of time, have both been applied to the times of the Sun's rising and setting: so that the Almanac, and a good clock, will agree the year round.

II. A Time-piece may be set very nearly true by the rising, setting, or southing of the Sun, Moon, or Stars,—but more accurately by the Sun (or the southing of the Sun, or a fixed Star), any where on or near the 40th degree of north latitude.

III. The time of the rising, setting, or southing of a fixed Star, may be carried several days forward by subtracting, or backward by adding, 4 minutes per day.

IV. The common day of 24 hours, begins at midnight, and morning (marked morn.) continues from midnight till noon; and afternoon (marked aft.) continues from noon till midnight; this should be remembered carefully when looking for the times of the rising, setting, or southing of the Moon or Stars soon after midnight.

ECLIPSES.

In the year 1871 there will be two Eclipses of the Sun, and two of the Moon.

I. A partial Eclipse of the Moon, on the 6th of First Month; the greater portion of this Eclipse occurs before sunset, consequently invisible; but the last contact with the shadow may be observed at New York 5h. 51m.; Philadelphia 5h. 46m.; Baltimore 5h. 40m.; Cincinnati 5h. 9m., in the evening.

II. An Annular Eclipse of the Sun on the 17th of Sixth Month invisible on this Continent; visible in the East India Islands and South Pacific Ocean.

III. A Partial Eclipse of the Moon on the 2nd of Seventh Month, commencing after sunrise, consequently invisible.

IV. A Total Eclipse of the Sun, on the 11th of Twelfth Month, invisible in America. The line of central and total Eclipse begins in lat. 19° 5′ N., and long. 61° 16′ E., passes southeastwardly through the Indian Ocean, touching the southern part of Hindoostan and northern part of Australia, then northeastwardly through the Pacific Ocean, and ends in lat. 0° 27′ N., and long. 177° 54′ W.

VENUS.

Venus will be Evening Star until the 22d of Ninth Month, after which it will be Morning Star the remainder of the year. It will be at its greatest brilliancy on the 20th of Eighth Month and 1st of Eleventh Month.

MERCURY.

Mercury will be brightest about the 8th of Second Month, 7th of Sixth Month and 30th of Ninth Month, at which times it will

likely be visible, being then in the east just before sunrise. It will again be brightest about the 4th of First Month, 26th of Fourth Month, 24th of Eighth Month and 17th of Twelfth Month, when it will be in the west, immediately after sunset.

EXPLANATION OF ASTRONOMICAL CHARACTERS.

THE PLANETS AND THEIR RELATIONS.

☉ or ⊙ The Sun	♀ Venus	♃ Jupiter
☽ The Moon	♁ The Earth	♄ Saturn
☿ Mercury	♂ Mars	♅ Uranus

☊ A Planet's ascending node.
☋ The descending node.
☌ Conjunction, or Planets situated in the same longitude.
□ Quadrature, or Planets situated in longitudes differing three signs from each other.
☍ Opposition, or Planets situated in opposite longitudes, or differing six signs from each other.

N.—North	Inf.—Inferior	Im.—Immersion
S.—South	Sup.—Superior	Em.—Emersion

SIGNS OF THE ZODIAC.

1st.	♈	Aries	(0+..)	7th.	♎	Libra	(6+..)
2d.	♉	Taurus	1	8th.	♏	Scorpio	7
3d.	♊	Gemini	2	9th.	♐	Sagittarius	8
4th.	♋	Cancer	3	10th.	♑	Capricornus	9
5th.	♌	Leo	4	11th.	♒	Aquarius	10
6th.	♍	Virgo	5	12th.	♓	Pisces	11

SEASONS.

The Sun enters ♈ Third Month 20th, at 8h. 19m. P. M. when Spring commences, and the days and nights are equal.

The Sun enters ♋ Sixth Month 21st, at 4h. 41m. P. M.: when Summer commences, and the longest day occurs.

The Sun enters ♎ Ninth Month 23d, at 6h. 55m. A. M.: when Autumn commences, and the days and nights are again equal.

The Sun enters ♑ Twelfth Month 22d, at 0h. 58m. A. M.: when Winter commences, and the shortest day occurs.

EPOCHS FOR 1871.

Dominical Letter	A	Julian Period	6584

Roman Indication 14

RISING, SETTING AND SOUTHING OF THE PLANETS.

It should be observed that these are not sensibly affected by the longitude of a place. When the hour is less than six, it is in the morning; when greater than six it is in the evening.

JOHN WOOLMAN.

Have you ever, gentle reader, chanced to meet with the history of the Life of John Woolman?

If you have not, then go, I pray you, to the Library of some ancient Quaker of your acquaintance, and borrow it. But do not read it then—not at least, if the "Wept of the Wish-ton-wish," with half its leaves still uncut, is lying upon your table—or if you have only just peeped between the pages of one of the Annuals,—but when you are wearied of all these things; when you sit among your "pleasant company of books," listless and discontented; when your heart turns sick with the long details of human crime and misery, written within your volumes of history; when biography serves but to humble you, with the knowledge that the best have been so frail, and the wisest so

ignorant; when philosophy, which has led you with a proud wing among the secret influences of nature, leaves you but a knowledge of your own ignorance—and poetry, glorious poetry, that you thought had almost become a portion of the life-spring of your heart,—you fed so long on its magnificent imaginings—comes only with a dazzling garishness to your worn and feverish spirit—then go, forget yourself for a while, in the unpretendingness of John Woolman's autobiography.

Were you ever ill of a fever? —and do you recollect the blessedness with which you closed your eyes, when the cool fingers of a beloved friend came and pushed aside the loose hair, and were laid upon your hot forehead.

With such a moonlight feel-

ing, will the pure simplicity of Woolman come to your sick heart.

There is no glitter of fancy, no display of stupendous intellect, no splendid imaginations to bewilder you into tears, with their intensity of brightness; it is not even a tale of striking or romantic incident; but it is the beautiful history of a meek heart laid open before you, in all its guilelessness. You will become familiar with a character of the most perfect humility, full of a simple majesty, yet gentle as a very child, unfaltering in its quiet self-denial and unbending to its own weakness, assuming no superior sanctity, lifting not up the voice of stern judgment against the frailties of others, and gifted with all the holy and affectionate charities of life.

You will feel a purifying influence steal gradually over your heart, while you bend over the quiet pages, calming the rude

beatings of its pulse into a thankful evenness, and cooling the impatient irritation of your spirit, with the lesson of its gentle words, till you feel almost as if the unworldly moments of your childhood's time had again come back to you.

E. M. CHANDLER.

A LADY in this city saw on the sidewalk a ragged, cold and hungry little girl, gazing wistfully at some of the cakes in a shop window. She stopped, and taking the little one by the hand, led her into the store. She bought and gave her the cakes she wanted. She then took her to another place, where she procured her a shawl and other articles of comfort. The grateful little creature looked the benevolent lady full in the face and, with artless simplicity, said, "Are you God's wife?" There was no profaneness, but tender and

solemn feeling in the heart of this child who thought of God as the kindest of all beings.—*S'd*

William Sewell says of Friends:—"It is usual among them, when they meet together in their religious assemblies to spend some time in a devout silence and retiredness of mind, inwardly praying with pure breathings to God; and if any one feels himself stirred up of God to speak something by way of doctrine or exhortation, he doth so, and sometimes more than one, &c. Yet, let none think this liberty of speaking to be so limited, that everybody that can say something may freely do so in the congregation; for he that will speak, there must by all means be of a good, and honest, and holy life and sound in doctrine.—*History* p. 416.

A day's journey was 33 1-5 miles. A Sabbath-day's journey

truth, know this, thou dost therein just as those that would learn to read without knowing the letters."—SEWELL.

THE LOVED AND LOST.

The loved ones whose loss I lament are still in existence; they are living with me at this very time; they are like myself dwelling in the parental mansion of God; they still belong to me, as I to them. As they are ever in my thoughts, so, perhaps, am I in theirs. As I mourn for their loss, perhaps they rejoice in an anticipation of our reunion. What to me is still dark, they see clearly. Why do I grieve because I can no longer enjoy their pleasant society? During their lifetime I was not discontented because I could not always have them around me. If a journey took them from me, I was not therefore unhappy. And why is it

different now? They have gone on a journey. Whether they are living on earth in a far distant city, or in some higher world in the infinite universe of God, what is that? Are we not still in the same house of the Father, like loving brothers who inhabit separate rooms? Have we therefore ceased to be brothers.—*Roman.*

"At a meeting with a society (of Labadites) in Germany (in 1477,) Wm. Penn, after some others had likewise given an account of their changes, Wm. Penn, also gave a circumstantial relation how he had been gradually drawn off from the vanity and pride of life, what adversities he had met with in the University of Oxford, because of his not joining in with the debauchery committed there, and how after having lived sometime in France, he had been convinced

by the effectual ministry of Thomas Loe, and so came to be joined with the despised Quakers. This relation he concluded with a serious admonition how they ought to go on, and to grow in the true fear of God. At parting, one of the *Pastors* asked him if the truth rose not first amongst a poor, illiterate and simple sort of people. 'Yes,' answered Wm. Penn; 'and it is our comfort that we owe it not to the learning of this world;' to which the *Pastor* returned: 'Then let not the learning of this world be used to defend that which the Spirit of God hath brought forth; for scholars now coming among you will be apt to mix school learning amongst your simple and pious language and thereby obscure the brightness of your testimony.' Wm. Penn having answered to the purpose, took his leave."—SEWELL, vol. ii., p. 255.

DEODORANTS.

For many purposes dry clay is not only the cheapest but the best deodorant. I tried nearly everything in a privy, and only succeeded by using occasionally small quantities of dry clay loam. I took equal quantities of old putrid urine, and mixed severally with clay, sulphate lime, animal charcoal, and wood charcoal. After a few hours the clay mixture alone was fully devoid of odor. It *destroys* or *absorbs* the foul odors, instead of partially overcoming them by substituting chlorine or coal tar in their place.

The presence of clay has a great influence upon the health of communities. I have known many cases of typhoid fever and dysentery in this vicinity within a few years, nearly every one of which has been on a sandy or alluvial soil. Where the water used has filtered through

a clay soil, there has hardly been a case of these diseases.

There is another advantage in the country in using clay for privies. The removal of the contents is no longer a disgusting operation, while the farmer or gardener has a valuable supply of fertilizing material for his grounds.

I believe that clay would be an excellent application to foul ulcers and other discharging sores —H. A. SHELDON, *Middleb'y, Vt*

"Our communion doth not stand only in frequenting meetings and hearing truth preached, but in answering the blessed principle of truth, in life and conversation, and therein both the rich and the poor have fellowship one with another.—*S. Crisp.*

WAR is as contrary to the spirit of Christianity as murder. —A. CLARKE.

COMPUTING INTEREST.

The following rule for computing interest is so simple that all business men should post it up for referenee. By no other arithmetieal process, ean the desired information be obtained with so few figures:

Six per eent.—Multiply any given number of dollars by the number of days of interest desired, and divide by sixty; the result is the true interest on such sum, for sueh number of days at 6 per eent.

Eight per cent.—Multiply any given amount by the number of days upon whieh it is desired to ascertain the interest, and divide by forty-five; the result will be the interest for the time required at eight per eent.

Ten per eent—Multiply the same as above and divide by thirty-six; the result will show the rate of interest at ten per cent.

YEARLY MEETINGS OF FRIENDS IN THE UNITED STATES.

Philadelphia, 2d-day after second 1st-day in 5th mo., 10 o'clock

New York, 2d-day after fourth 1st-day in 5th mo., 10 o'clock.

Genesee, 2d-day after second 1st-day in 6th mo., at 11 o'clock At Pickering, Canada West, 1870—Farmington (Ontario Co., 2 miles S. E. of Rochester), N. Y., 1869, alternately.

INDIANA ANNUAL CONFERENCE OF FIRST-DAY SCHOOLS, onathan W. Plummer, Richmond, Ind., Elizabeth S. Evans, Vaynesville, O., Clerks.

An Edinburgh journal says: "There is at present to e seen at Greig's Temperance Hotel, Aberdour, a fine ortoise shell cat nursing one kitten and three ducks. The ducks were hatched on the same day as the kittens, hree of which were taken away and the ducks substi- uted. Puss lifts the ducks to any place they cannot ollow her, and if supplied with food of any kind, will lace it before the ducks and sit by while they are feed- ng. She seems even more affectionate towards the ucks than to the remaining kitten; but her composite mily is a decidedly happy one, and the young nestle ogether when mater familias is absent in the most miable manner. The phenomenon has attracted much ttention in the district.—*The Friend.*

DUTCH DAIRIES.

"CARLTON" writes from Holland to the Boston *Journal*:

The farmers' boys and girls of America, I am confident would like to go with me into a Dutch farm-house. Stable and house, and dairy are under the same roof. The house which we visit stands on the bank of the canal—the water in the canal almost on a level with the ridge pole. One of the dairy maids has been out in the canal to wash her pans and dishes and now she is taking them back to the house, drawing them in a little cart. Look at her shoes—wooden ones, turning up at the toe like a skate—clump, clump, clump they go as she steps. She leaves them outside the door, and puts on a pair of slippers as she enters. She has a bonnet so curious that I shall not attempt to describe it, but of just such a pattern as those worn by her grandmother. Some of the cattle are in the fields, blanketed to keep them warm.

A girl with red cheeks and bright eyes opens the door of the stable, and takes us along the stalls to see the cows—twenty-six cows standing by their cribs, or lying down chewing their cuds, fastened with rope halters—and, funniest of all sights, each cow has her tail drawn up to the ceiling by a cord and pulley, so that in time their tails grow straight up into the air! There are great tubs filled with milk and curds and whey; there is a fire-place in the stable where they scald the milk; also the cheese-press. We enter a little room and see pots of butter and rows of cheese—not such great ones as the Vermont and New Hampshire girls turn out, but cheeses almost the size of a 64-pounder cannon ball, not quite round but like the earth, flattened a trifle at the poles. If you were to go with me into some of the warehouses of Amsterdam you would see cart loads of these cheeses, enough to freight scores of ships. They are kept for months, and years even, and never lose their goodness, it is said. You have read how a Dutch Admiral, in a sea fight, after having fired away all of his cannon balls, kept up the battle with cheeses—just such cheeses as these which the bright-eyed dairymaid takes pleasure in showing.

We go from the stable up a short flight of steps, into the kitchen, and say, "Goot morning" to the farmer's wife, who courtesies like a little child. She shows us over the house, draws aside a curtain, and shows the beds in the recesses

along the wall, like a berth in a ship. An old clock—its brass weight and pendulum as bright as sand and soap can make them—ticks in one corner. The good woman is drinking a cup of coffee, but if you were to ask her to write out the word for you in Dutch, it would read "Kaffij;" and she would call a railroad a "Spoorweg." She takes great pleasure in showing us her treasures in the "front" room—a bureau of the richest mahogany, set off with bed mountings, with carved feet like lion's claws—with rows of Delft china dishes around the room just under the ceiling—old ware, cups and saucers which her great-grandmother used, which she will hand down to her daughters, and they to their children. There are old pictures on the walls—fine engravings—more old china on the tables and stands. Everything is so clean and nice that you are almost afraid to be in the room.

ACCOUNT OF A REMARKABLE CIRCUMSTANCE

Which befell James Dickinson and Jane Fearon while on a religious visit in Scotland.

After they had been traveling in a very rainy tempestuous day, evening coming on, they inclined to stop at a little public house, in order to lodge there that night.; but a guide they had hired, discovered, as far as they could understand his Scotch manners and dialect, his unwillingness for them to stay there, informing them there was a place about three miles further on where they might conveniently lodge, and whither he wanted to go; and that if they stayed he would go on himself. But they being wet and weary, concluded to stay; so discharging the guide, he went forward, being only hired for the day.

After they had been a short time in the house, their minds were struck with painful apprehensions that the people of the house had a design upon their lives; and notwithstanding they behaved to them with apparent kindness and attention, the painful apprehension continued and increased. On the woman of the house helping Jane to a piece of pie, and urging her to eat it, these words struck her mind, "she intends to serve thee otherwise before morning." Jane believing the pie to be filled with human flesh could not taste it.

There was another woman or two in the same room with them who appeared to belong to the house; the Friends also

saw three men in and about the house, who were frequently in the same room observing them, but in what capacity these men were, or what proper business or employment they had there, they could form no judgement.

Jane also heard the men say one to another, "they have good horses and good bags," to which another added "aye and good clothes." The lonely situation of the house and these appearances, which the painful feelings attending their minds led them to observe, tended to increase the apprehensions they had of these wicked people's designs; which the Friends endeavored to conceal from each other, each concluding not to discourage the other.

James Dickinson having seen the horses taken care of and their saddles taken off, they then inquired for beds, and were shown into a room wherein were two beds. After shutting the door, Jane sat down on the bedside, being no longer able to contain, broke out into tears, saying, "I fear these people have a design to take our lives," upon which James, after walking some time across the room, came towards her and said, "they have mischief in their hearts, but I hope the Lord will preserve our lives." He also endeavored to encourage Jane; and after some pause, said, "I hope the Lord will deliver us, but if so, we must run." Upon this Jane replied, "alas! how can we run, or whither shall we go?"

Then James taking the candle and carefully examining the room, discovered a door which he opened, and on searching, perceived a pair of back stone stairs that led to the outside of the house. Upon this discovery, putting off their shoes, they went softly down, leaving the candle burning in the room. On going down stairs, James saw through an open place in the stairs a woman with a candle in her hand. After running a considerable time, they met with an out building, into which they went; but when they had stopped a short time, James said to Jane Fearon, "we are not safe here, we must run again," to which Jane replied, "I am so weary, I think I cannot go any further;" but James pointing out the necessity, she endeavored, and they ran again till they came to a river near the south coast.

On going a little further along the side of it, they came to a bridge, but on their attempting to go over it,

James felt a stop in his mind, and said "we must not go over this bridge, but must go further up the river-side," which they did, and then sat down. After some time, James Dickinson grew uneasy and said "we are not safe here, we must wade through the river." Jane Fearon replied, "alas! how can we cross it and know not its depth, also adding "Rather let us wait here and see what they are permitted to do; it will be better for them to take our lives than for us to drown ourselves;" apprehending the river to be exceeding deep. James replied, "fear not, I will go before thee;" upon which they entered the river and got safe through. Walking some distance, they came to a sand bank; here, again sitting down, James said to Jane Fearon, "I am not yet easy, we must go further," upon which Jane said, "well I must go by thy faith, I know not what to do." Then going a little further, they found another sand bank, wherein was a cavity where they sat down; after awhile James said, "I am now easy, and believe we are now perfectly safe, and feel in my heart a song of thanks-giving and praise;" Jane replied, "I am so far from that, I cannot so much as say the Lord have mercy upon us."

When they had been here some time, they heard the noise of some people on the other side of the river, upon which James Dickinson finding Jane alarmed, and thence fearing they should be discovered, softly said, "our lives depend upon our silence." Then attentively harkening, they heard them frequently say "seek them keeper," and believed they were the men they had seen at the house, accompanied by a dog, that the dog refusing to go over the bridge, had followed the scent of their feet up the riverside to the place they crossed.

Stopping at this place, the people again repeatedly cried, "seek them keeper," which they not only heard, but saw the people with a lantern; they also heard one of them say they had crossed the river, upon which another replied, "that's impossible, unless the devil took them over, for the river is brink full." After wearying themselves a considerable time in their search, they went away, and James Dickinson and Jane Fearon saw them no more.

When daylight appeared, they saw a man on a high hill at some distance, looking about him every way, apparently with an intent of discovering something, and they apprehended it was them. They continued quiet in their retreat till some time after sunrise, when, upon taking a view of their situation, they discovered that under the first sand bank from whence they removed, they could have been seen from the other side of the river, and that the place they continued in, shaded them from being seen on the opposite side, which they had been insensible of, as they could not make the observation the night before.

Upon considering what they should do to recover their horses, saddle-bags, &c., James said, "I incline to go to the house." But Jane proposed to go to a town, in order to get assistance to go with them to the house, to which James observed that the town from whence assistance was likely to be procured, was about 10 miles off; that they were strangers; their reason for taking such precautions in returning to the house, implied a high charge which they might not be able to prove; that thence occasion might be taken to throw them into prison by a magistrate, and might more dispose the civil power to seek occasion against them than to search into the cause of their complaints or redress their wrongs. Jane still hesitating, James said, "I still incline to return to the house, fully believing our clothes, bags, &c., will be ready for us without our being asked a question, and that the people we saw last night we shall see no more." Jane said, "I dare not go back." James replied, "thou may'st Jane, safely, for I have seen that which never failed me;" upon which they returned to the house and found their horses standing in the stable and their bags upon them; their clothes dried and ready to put on; and saw no person but an old woman sitting in a nook by the fireside whom they did not remember to have seen the night before. They asked her what they had to pay, discharged it, and proceeded on their journey.

Some time after, James traveling that way, made some enquiry respecting the people of that house, and

was informed, that, upon some occasion, the people had been taken up and the house scarched; that a great quantity of men and women's apparel was found in some parts of the house, also a great number of human bones; that some of the people were executed, and the house ordered to be pulled down, which then remained a heap of rubbish.—*Annual Monitor.*

SIGNS OF THE WEATHER.

Admiral Fitzroy, in a publication authorized by the Board of Trade, (England,) says: "The old remark about a ruddy evening and gray morning (alluded to in the Gospel of Matthew) as indicating good weather, meets full approval; so also, that a red sky in the morning foretells bad weather; or much rain if not wind." The Admiral adds, "that a high dawn denotes wind, and a low dawn fair weather. When clouds have a soft and delicate appearance, fine weather may be looked for; when they are hard and ragged, wind is to be expected. Misty clouds forming or hanging on heights, show wind and rain coming, if they remain or descend; if they rise or disperse, the weather will improve or become fine. When sea-birds fly out early or far to seaward, moderate wind and fair weather may be expected; when they hang about the land or over it, sometimes flying inland, expect a strong wind with stormy weather When birds of strong flight, such as swallows, hang about home and fly low, rain or wind may be expected; also, when pigs carry straw to their sties, and when smoke from chimneys does not ascend readily. Dew is an indication of fine weather, so is fog—remarkable clearness of atmosphere."

In warm weather it is almost impossible to prevent sinks becoming foul, unless some chemical preparation is used. One pound of copperas dissolved in four gallons of water, poured over a sink three or four times, will completely destroy the offensive odor. As a disinfecting agent, to scatter around premises infected with any unpleasant

odor, it is announced that nothing is better than a mixture of four parts dry ground plaster of Paris to one part of fine charcoal by weight. All sorts of glass vessels and other utensils may be effectually purified from offensive smells, by rinsing them with charcoal powder after the grosser impurities have been scoured off with sand and soap.—*Phila. Ledger.*

VANITY IN DRESS.

We have sometimes hesitated whether to call vanity in dress a sin or a sign. We shall explain our meaning by an anecdote. Some young ladies feeling themselves aggrieved by the severity with which their friends animadverted on their gay plumes, necklaces, flounces, &c., went to their pastor to learn his opinion. "Do you think," said they, "that there can be any impropriety in our wearing these things?" "By no means" was the reply: "When the heart is full of ridiculous notions it is perfectly proper to hang out the sign."—*Barrett's Christian Citizen.*

CHRISTIAN ZEAL.

James Gough, in the narration of his own life, relates of John Ashton of Kileonimore in Ireland, (who was an old man when J. G. saw him) that he with his wife, when at liberty, (he was imprisoned for tithes soon after his convincement) constantly attended the meeting at Birr twice a week, generally walking on foot thither being about 7 English miles, and a very bad road; wading through a river, both going and returning. In winter, they sometimes had the ice to break in crossing the river, and John said he had wept to see the blood on his wife's legs coming through it In those days truth was precious to its professors, who also possessed it, and no difficulties or dangers could prevent them from getting to their religious meetings, to enjoy the renewings of Divine Love and life with their brethren.—*Barclay Anecdotes.*

THE HORRORS OF WAR.

"The father of Louis Napoleon thus writes in one of his letters: "I have been as enthusiastic and joyful as any one after a victory; but I confess that even the sight of a field of battle has not only struck me with horror, but even turned me sick: and now that I am advanced in life, I cannot understand any more than I could at 15 years, how beings who call themselves reasonable, and who have so much foresight, can employ this short existence, not in loving and aiding each other and passing through it as gently as possible, but on the contrary in endeavoring to destroy each other, as if time did not do this with sufficient rapidity. What I thought at 15 years I still think; war, which society draws upon itself, is but an organized barbarism and an inheritance of the savage state however disguised and ornamented."—*London Herald of Peace.*

WILFUL CHILDREN.

Be sure to give no commands of which you cannot enforce obedience. The powers of resistance possessed by some little children are truly extraordinary; be careful not to arouse them A spirit of antagonism is most dangerous, and once awakened, may never again become dormant through life. Once let a child conquer you, and it will never forget the lesson. Let your commands then be few, and insist on obedience to them.

Supporting a life of godliness, is like unto successful management and economy in outward and domestic affairs. If attention is not paid to minute matters, frugally to save and avoid unnecessary expenses, there is a greater probability, step by step, of a declension in point of property, than by large undertakings, which naturally exeitc caution. He who learns, by Divine assistance, to make a right application in small matters of a spiritual nature, will not fail to accomodate much treasure as well as he who is attentive on temporal concerns. Great things are only great because many small materials are brought and combined together; he who is careful to lose nothing, will generally increase his wealth.—*Translated from the French.*

With respect to the first, *custom*, it will never pallia for wrong things, whether in this, that or the other plac or having this, that or the other person's conduct for i support, however pious or religious they may be. Pio people may, by this cruel tyrant custom, be led in things, which, had they examined the foundatio and not implicitly followed custom or the multitud they would have clearly seen are not consistent wi the simplicity and purity of that religion we profes and which the author of it taught by precept and e ample, both of which we ought to follow. Rememb he said, "I am meek and lowly of heart;" he also sai "he that will be my disciple, must first deny himse take up his daily cross and follow me."—*Jas. Mott's Le ters.*

STORY ABOUT A RAT.

The driver of a Bow and Stratford omnibus was mo ing some trusses of hay in his hay loft, when he found little miserable looking rat coiled up in a corner. As happened to be a piebald color, the driver spared i life and took it to his home, where it became remarkabl tame, and grew much attached to the children. A night it exhibited its delight in security and warmth b stretching itself at full length on the rug before the fir and on nights when the fire was extinguished, it woul creep into its master's bed. The children named the new pet "Ikey," after their eldest brother, whose nam was Isaac. The driver became so fond of his rat, tha he taught it, at the word of command, "come alon Ikey," to jump into his great coat pocket in the mor ing when he went forth to his daily occupation. Fro his master's pocket, Ikey was occasionally transferre to the boot of the omnibus, where its business was t guard its master's dinner, and if any person attempte to make free with it, the rat would fly at them from ou the straw.

There was one dish alone of which it was an insecu protector. It never could resist plum pudding, an tho' it kept off all other intruders, it ate as much as was able. Ten years ago this rat was alive and in goo

health, and in its old age was kindly attended to by its protectors. It had lost its teeth, and was fed by the children as if it had been a baby and not a white haired old rat.—*Childrens' Friend,* (British).

If there be such a thing as pure and perfect joy upon earth, it is that which fills the heart of a parent, when he hears of the wisdom, the virtue and the prosperity of a darling child. If there be sorrow that admits not of consolation, it is the sorrow of a father for the vice or folly of an ungenerous, thankless son, and for the misery in which he has plunged himself.—*H. Hunter.*

When the most lawful business or calling comes to have so much place in our minds, or engrosses so much of our attention as to interfere with known duty, then it is highly necessary to call in question the expediency of following it any longer, or at least that we abate in the pursuit thereof. Experience has taught me this. I am free to tell thee how it fared with me when in trade. I sometimes had so much business on hand that I could hardly get to meeting, and indeed sometimes did not go on that account. As it increased, and I gave way to it, I found it more and more difficult; even when I did go to meeting, I frequently carried it with me, and finally began to think my business was of such consequence, and I had so much of it, that it was a sufficient excuse for staying, sometimes, from meeting. Oh, where should I have been at this day had not a kind Providence prostrated my schemes and intentions.—*Letters of Jas. Mott Sr.*

PERFECT LOVE.

To love our enemies; to love them to that extent that they may become our brethren; to love thine enemies that thou mayst wish them to become thy brethren; to love thy enemies that they may be called into thy society; for thus did He love, who, as He hung upon the cross exclaimed, "Father forgive them; they know not what they do."—*Augustine.*

FRIENDS' PUBLICATION ASSOCIATION, PHILADELPHIA,

ORGANIZED IN THE SPRING OF 1868.

Annual Meeting will be held on 2d day Evening of Yearly Meeting Week, 5th mo. 15th, 1871, at 8 o'clock.

ARTICLE 2.—The objects of this Association are as follows:—

1st. To publish and to encourage the writing of books, pamphlets, &c., calculated to spread a knowledge of the principles and testimonies of Friends, and suitable elementary and miscellaneous works, and to enable Friends to procure such books for distribution in their respective neighborhoods.

2d. To procure books not inconsistent with our religious principles, and to dispose of them by sale or gift to individuals, schools and libraries.

3d. To aid in extending the circulation of approved periodicals.

Liberal contributions to the Funds are solicited, which may be sent to the Treasurer, Jos. M. Truman, Jr., 717 Willow street, or to the following agents (also those on the title page of this Almanac), who keep an assortment of Friends' books on hand:

John J. Cornell, Mendon Centre, New York.
Griffith John, Bear Gap, Pennsylvania.
Dr. E. Michener, Toughkenamon, Pennsylvania.
Lewis Palmer, Concordville, do.
Willis Corkran, New Hope, Maryland.
Mordecai T. Bartram, Edgemont, Delaware Co., Penna.
Ellis Eves, Millville, Pennsylvania.
S. Mickle Ogden, Upper Greenwich, N. J.
Jesse Webster, Jr., Smyrna, Pennsylvania.
Nathaniel Richardson, Byberry, do

SILENT PRAYER.

Some persons when they hear of the prayer of silence, falsely imagine that the soul remains stupid, dead and inactive, but unquestionably it acteth therein more nobly and more extensively than it had ever done before; for God himself is her mover, and she now acteth by the energy of the Spirit.—*M. Guion.*

PEACE *vs.* WAR.

War is soon kindled, but *peace* very hardly procured war is the curse, and *peace* the blessing of God upon a nation.

A realm gains more by one year's *peace* than 10 years' war.—*Lord Burleigh.*
